**Software Engineering Services (SES) Is Re-Assessed at CMMI Level 3
Using Process-Trak for CMMI**

Re-Appraisal Runs Smoothly with Automated Tool

BELLEVUE, Nebraska —November 13, 2008 — Software Engineering Services (SES) today announced that they have been re-appraised at maturity Level 3 of the Capability Maturity Model Integration (CMMI) version 1.2 using Process-Trak for CMMI. The Software Engineering Institute (SEI) limits the validity of CMMI certification appraisals to a maximum of three years. As a result, SES, a Software Engineering Institute (SEI) partner that provides system and software engineering services, project management and process improvement support focusing on the CMMI model, underwent a successful re-appraisal.

With SES's CMMI solution, Process-Trak, the company eliminated paper-based processes, improved software application quality and significantly reduced the time to deploy repeatable processes to several of their project teams.

“Process-Trak for CMMI helped validate process details and showed evidence that management practices were in compliance, said Jim Moudry, Director of Technology and Product Development, SES. “It helped us integrate all of the necessary process assets and deliver electronic documents to staff members when they are involved in each step of the process. Process-Trak's user-friendly interface was easy to roll out to all team members and the reporting options assisted us in providing an end-to-end audit trail.”

“We were able to quickly access data and information during our SCAMPI A. We've set a new standard for CMMI re-appraisals,” said Jim Bridges, President and Chief Executive Officer, SES. “CMMI process improvement practices promote more precise project cost and schedule estimates with substantially reduced software defects. We're proud to say that our emphasis on CMMI, quality, customer satisfaction and staff productivity continues by using Process-Trak.”

About Software Engineering Services (SES)

SES, a CMMI Maturity Appraised Level 3 Company, has proven expertise in the following disciplines: process improvement, process re-engineering, change management, program/project management, system/software development, IT testing, information security, quality assurance and independent verification & validation. Serving Fortune 200 companies as well as federal and state government, SES is recognized as a premier IT solutions provider. For more information, visit us at www.sesolutions.com.
