

NASA SEWP VI

ORDERING GUIDE

Software Engineering Services (SES)

Category C - ITC/AV Mission-Based Services

Contract Number: 80TECH26D1830

Corporate Headquarters

1311 Fort Crook Rd South, Suite 100
Bellevue, NE 68005
402-292-8660

September 2026

1. NASA SEWP VI Overview

NASA Solutions for Enterprise-Wide Procurement (SEWP) VI is a multiple-award Government-Wide Acquisition Contract (GWAC) that provides federal agencies and their approved contractors streamlined access to Information Technology, Communications, and Audio-Visual (ITC/AV) solutions and services.

SEWP VI consists of three categories:

- Category A - ITC/AV Solutions
- Category B - Enterprise-Wide ITC/AV Service Solutions
- **Category C - Mission-Based ITC/AV Service Solutions**

SES has been awarded a Category C - Mission-Based ITC/AV Services contract. Category C is designed to provide customized technology services at the mission and program level. Product-only requirements are not within Category C scope; ancillary products may be included when integral and necessary to an authorized services solution.

NASA anticipates SEWP VI going live on November 1, 2026, with a period of performance through October 31, 2036. Each SEWP VI contract has a maximum value of \$20 billion.

2. SES SEWP VI Contract Information

Contract Item	SES Information
Contract Holder	Software Engineering Services (SES)
Contract Number	80TECH26D1830
Category	Category C - ITC/AV Mission-Based Services
Contract Vehicle	Multiple-Award Government-Wide Acquisition Contract (GWAC)
Period of Performance	November 1, 2026 - October 31, 2036
Contract Maximum	\$20 Billion
Primary NAICS	541512 - Computer Systems Design Services
SEWP Administrative Handling Fee	0.34%
UEI	RS9KEMDN4669
CAGE Code	1FCF2
Corporate Headquarters	1311 Fort Crook Rd South, Suite 100, Bellevue, NE 68005 402-292-8660

SEWP VI Program Manager

Name: Jessye Dee

SEWP VI Deputy Program Manager

Name: Christine Busick
Title: Program Management Support
Role: Deputy Program Manager
Phone: 940-735-2867
Email: cbusick@sessolutions.com

3. SES Category C Scope

Through its SEWP VI Category C contract, SES provides mission- and program-level ITC/AV services designed to support the specialized technology needs of federal agencies. Representative service areas include:

- Innovation Services
- Information and Data Analytics Services
- Application Services / Software Development
- Cybersecurity Services

- Cloud Services
- Digital Multimedia and Technical Communications Services
- IT Operations and Maintenance / Help Desk Support
- Network Services
- Database Services
- In-Scope Training
- Program Management / Ancillary Services and Supplies

NASA identifies these technical areas as representative rather than all-inclusive. Additional ITC/AV services may be within Category C scope when they support an agency mission or program and otherwise meet SEWP VI requirements.

4. How to Obtain a Quote

Federal customers interested in obtaining information or requesting a quote under the SES SEWP VI contract may contact the SES SEWP VI Program Office.

Request a Quote / Program Information

Jessye Dee

Director, Strategic Relations | SEWP VI Program Manager

Phone: 402-502-2766

Email: jdee@sessolutions.com

Customers may also use the NASA SEWP Quote Request Tool (QRT) to submit requirements and obtain competitive quotations from appropriate SEWP VI Contract Holders. The QRT is NASA's recommended method for facilitating Fair Opportunity.

NASA SEWP Website: [NASA SEWP Home Page](#)

5. Ordering Process

Individual agencies establish their own internal purchase-request and acquisition procedures. A typical SEWP ordering process is:

Step 1 - Define the Requirement

The federal customer identifies its mission requirement and develops the appropriate acquisition documentation.

Step 2 - Obtain Competition / Quotes

The customer or Contracting Officer uses the NASA SEWP Quote Request Tool or another authorized process consistent with Fair Opportunity requirements to obtain quotations from eligible Contract Holders.

Step 3 - Evaluate Responses

The ordering agency evaluates quotations in accordance with its acquisition requirements and applicable federal procurement regulations.

Step 4 - Issue and Submit the Order

The ordering agency's procurement office issues the order and submits it to the NASA SEWP Program Management Office (PMO) for processing.

Step 5 - NASA SEWP Processing

The NASA SEWP PMO reviews, processes, tracks, and forwards the issued order to the selected SEWP VI Contract Holder.

Step 6 - SES Performance

SES coordinates with the customer to initiate performance, establish order-level points of contact, and deliver the services and other approved requirements specified in the order.

Important: The issuing agency - not the NASA SEWP PMO - issues the order. The SEWP PMO reviews, processes, tracks, and forwards issued orders to Contract Holders. Order modifications must also route through the SEWP PMO.

6. Fair Opportunity

SEWP VI is a multiple-award Government-Wide Acquisition Contract. Ordering agencies are responsible for complying with applicable Fair Opportunity requirements when placing orders under the vehicle. The NASA SEWP Quote Request Tool is available to facilitate competitive quote requests and assist agencies with Fair Opportunity documentation.

A.1.13 FAIR OPPORTUNITY AND REQUESTS FOR QUOTES

Contractors will be provided a fair opportunity at the individual order level as appropriate per FAR Part 16.505(b), including the SEWP RFQ tools. No documentation for the order selection is required to be submitted with the order. All such documentation is to be maintained by the issuing procurement office.

The Contractor shall not market, quote or otherwise offer for sale, any IT Solutions not listed under this contract, until the said solutions are included in the SEWP database of record, and available to all Government end-users. If the Government issues a Request For Information (RFI) as part of market research, the Contractor may provide items not yet listed on their SEWP contract as part of a market research quote if:

1. all such items are clearly marked as not yet available on their SEWP contract; and
2. the contractor submits a technology refreshment request to add those products to their contract.

If the Government issues a Request For Quote (RFQ) or a Market Research Request (MRR), the Contractor may only respond with items available on their Contract and the price of each item shall be no greater than the price in Attachment F SEWP database of record at the time the quote is issued. If the Contractor has insufficient items on their contract to fully respond to the Formal RFQ, the Contractor must respond with a No Bid.

Unless the RFQ specifically allows for partial quotes, the Contractor must respond fully to all requirements specified in the RFQ.

When submitting a quote to a government end-user, the contractor must clearly state the length of time the quote is valid. The contractor shall honor any order submitted within the stated time period of a quote. When responding to an RFI or RFQ issued from the NASA SEWP RFQ on-line quoting system, the Contractor must respond as outlined in Attachment C: Contract Holder User Manual (CHUM).

Contract Holders are prohibited from using Government information posted on the NASA SEWP Contract Holder Only Page, such as RFQs, RFIs, etc., for purposes other than proposing on SEWP requirements. This includes Contract Holders providing third parties with SEWP information and requirements for the purpose of assisting companies, that are not SEWP Contract Holders, with providing unsolicited proposals to meet agency requirements already posted to the NASA SEWP RFQ on-line quoting system.

7. Technical & Post-Delivery Support

Because SES holds a Category C mission-based services contract, technical and post-delivery requirements will generally be established at the individual order level based on the services being provided.

SES will coordinate with the ordering agency to address applicable:

- Installation or implementation support when included in the service solution
- Basic warranty and extended warranty requirements, as applicable
- Technical support
- Software support
- Service-level requirements
- Corrective actions
- Deliverable issues
- Transition and knowledge-transfer requirements
- Other post-delivery requirements specified in the order

Warranty

For services provided directly by SES, warranty or correction-of-services requirements will be governed by the applicable order and contract terms. When ancillary commercial products, software, or third-party components are included as an integral part of an authorized Category C services solution, applicable manufacturer or

publisher warranty terms will apply unless otherwise specified in the order. Extended warranty or maintenance coverage may be provided when included in the approved requirement and quotation.

Email: jdee@sessolutions.com

8. Problem Order Resolution

SES is committed to promptly addressing issues affecting the performance of a SEWP VI order. Customers experiencing an order-related issue should contact the SES SEWP VI Program Office and provide, when available:

1. Agency name and customer point of contact
2. SEWP order or tracking number
3. SES contract number
4. Brief description of the issue
5. Relevant dates or deliverables
6. Desired resolution or required response date

SES will review the issue, coordinate with the appropriate technical, contractual, or program personnel, and work with the customer toward resolution.

Problem Order Contact

9. About Software Engineering Services

Founded in 1991, Software Engineering Services (SES) provides technology and business solutions to government and commercial clients. SES supports federal mission environments through capabilities that include cybersecurity, systems analysis and integration, software development, independent verification and validation, process engineering, data and technical services, and program management.

SES is a Service-Disabled Veteran-Owned Small Business with a process-oriented approach supported by its CMMI-DEV Maturity Level 3 rating and ISO 9001 quality-management certification.
